

# TRUCK MOUNTED 16 to 24 metre

*Australian built for tough Australian conditions*

*Hayes Spraying build a rugged and simple truck mounted boom suitable for contractors and large broadacre farmers alike.*

*Booms are supplied fully fitted to the truck, including 12 volt charge system and hydraulic power pack. Booms are standard with individual hydraulic wing lift, hydraulic boom lift, and self levelling for the boom.*

*The trucks are fitted with Davey twin impellor firefighter pumps, plumbed for loading and spraying. The rear step gives access to the large tray, with enough room to mix and store chemicals, and accessories.*

*Plumbing is simple to reduce the risk of chemical contamination, using high quality, chemical resistant hose and standard sized fittings. Quality Tee - Jet electric ball valves are fitted to control 3 boom sections.*

*Monitors are factory fitted to be close at hand, so all functions are easily reached. Sprayers are fitted with an engine stop in the cab.*

*Truck mounted booms are available for 3 ton and 5 ton trucks, fitted with 2000 or 3000 litre tanks, with booms 16 to 24 metres in width.*

# SKID ON BOOMSPRAYS

## 12 to 18 metre

*Australian built for tough Australian conditions*

*The extra large tray area, gives the operator plenty of room to mix and store chemical and accessories.*

*The Davey twin impellor firefighter pump with Honda engine has a remote mounted Donaldson air cleaner, for smoother running and long engine life in dusty conditions.*

*The sprayer comes standard with 12 volt hydraulic power pack, hydraulic wing lift, self levelling boom and parking jacks. Skid on booms are available with a 1000 or 1200 litre tank and 12, 16 or 18 metre boom widths.*

*The Hayes Spraying skid on sprayer built for larger 4 wheel drive utilities, is packed with features to give the operator years of reliable service.*

*Plumbing is simple to reduce the risk of chemical contamination, using high quality chemical resistant hose and standard sized fittings. Quality Tee-Jet electric ball valves are fitted to control 3 boom sections.*

*A wide fold down rear step, with handrail, gives safe access to the rear work area. A sensible layout of camlock fill points, filters and taps allow the operator to fill quickly and efficiently.*
